Conforms to UL Standard 471,  
and NSF Standard 7; Certified  
To CSA Standard C22.2 No.120

Conforms to NSF STD 7  
**TYPE II**

**DOE 2017**  
Energy Efficiency  
Compliant

Hussmann refrigerated merchandisers configured for sale for use in the United States meet or surpass the requirements of the DOE 2017 energy efficiency standards

- For optimum performance, these merchandisers are designed for use in stores where ambient temperatures and humidity do not exceed 80 Degrees Fahrenheit and 60% R.H. Locate away from direct sunlight, rapid air currents and extreme temperature changes. Exposure to air currents from ceiling fans, air conditioning diffusers, ovens, etc. will disrupt the case air curtain and refrigerated zone. Refrigerated Displays are designed to maintain pre-chilled products. Adding or loading warm products above 41 Degrees Fahrenheit can affect the temperature in the entire cabinet.

RPI in line with its current policy reserves the right to change or revise specifications and product design in connection with any feature of our products. Such changes do not entitle the buyer to corresponding changes improvements, additions, or replacements for equipment previously sold or shipped.
